

## The Lantau Group announces the addition of Dr Xinmin HU to our team

Dr Hu joins TLG in Hong Kong. He brings extensive knowledge and international consulting experience in the electricity, coal, natural gas and renewable energy industries. Dr Hu will be leading TLG's market analysis work, along with Dr Thomas Parkinson, Dr Keith Gelling and the rest of the TLG team.

a peek at  
**DR XINMIN HU**

Dr Hu has extensive experience in relation to the operation of power and environmental markets, the valuation of power generation assets, optimisation of network and generation expansion options, development of optimal bidding strategies, and in the areas of financial and risk management in spot and forward electricity markets. Widely published, Dr Hu has developed a number of advanced power market simulation and market data analysis software tools.

TLG welcomes Dr Hu to the team as we work to enhance and expand our capabilities in fundamental analysis of competitive power markets in Australia, New Zealand, Singapore, the Philippines and Korea. Dr Hu also has extensive knowledge and experience in China's power sector, whose growth and evolution is not only facing great challenges domestically but also affecting commodity markets and their supply chains globally.

TLG provides rigorous fundamental analysis of Asia Pacific energy markets.

## Examples of Dr Hu's work

Authoring country reports covering the energy industry and global trading issues for Australia, China, India, Japan, New Zealand and Malaysia for the 2008 East Asia Summit (EAS).

Providing long term market simulation of investment opportunities in Australia's conventional energy and renewable energy sectors for a number of developers.

Modeling daily gas consumption, gas contracts and gas transportation costs for a gas fired power station.

Preparing expert witness reports for a number of generators and integrated companies in Australia.

Assessing the impacts of the Australian Mandatory Renewable Energy Targets and Carbon Pollution Reduction Scheme (CPRS) on the generation portfolio of major stakeholders.

Developing spot price and Renewable Energy Credit price projection under proposed CPRS and expanded RET for a number of wind farm operators/developers.

Most recently, Dr Hu has specialised in the modelling of carbon markets, the evaluation of energy efficiency and environmental policies, and in emissions permit trading in the support of a major rating agency's operation in Australia and Europe, for government agencies and the private sector. European Union and Australia.

Dr Hu has developed broad knowledge of environmental policy developments in countries such as China, New Zealand, South Korea, Japan, and the United States. Dr Hu strengthens TLG's energy and environmental team, bringing experience in GHG footprint calculation across various industry sectors, emissions scenario development, financial liability modelling, and supply chain impact assessment of various carbon pricing and pass-through mechanisms.
