

Natural Gas and LNG Markets

At The Lantau Group, our power-side capabilities give us unique insights into the drivers of gas demand throughout Asia. We are known for innovative solutions to new challenges, developing regulatory and commercial structures to capture value and enable new projects.

With decades of experience working with some of the region's leading energy stakeholders on commercial and regulatory matters, we bring analytical rigour and a multi-disciplinary perspective to our Natural Gas and LNG Markets advisory.

We work with a wide range of clients, on commercial and regulatory aspects of gas and LNG markets around the region:

- Oil and gas companies and Leading Utilities
- Large gas users and Independent Power Producers
- International Aid Agencies
- Financial Institutions
- Market and System Operators
- Regulatory Agencies and Government Ministries

Our Natural Gas and LNG Experts

1 Are engaged to provide:

- Insights and projections for natural gas across Asia Pacific
- Economic, regulatory and strategic analysis to underpin investment decisions
- Robust and objective analysis in complex and sensitive matters

2 Bring complementary areas of experience to provide clients with:

Full Value Chain Expertise
